

Draftsman

PURPOSE OF POSITION

Support the designers in the development of the lighting plans and details; as well as the supporting documents for the concept and design development stages.

MAJOR RESPONSIBILITIES

Duties

- Support the lighting design department in developing the deliverable packages of Cad lighting layouts (Plans, sections, details and Elevations) for the concept and design development stages of the project.
- Liaise with the department to submit the technical specifications, installation sheets and bill of quantity.
- Develop Blocks, Cartouche and Legend formats.
- Supports the PM on site by occasionally performing visits and follow up on site; as well, coordinates with the logistics department for proper product deliverables to the site.
- Develop the technical drawing details for the custom made lighting products.

WORK CONTACTS

Close collaboration with the design department and technical department.

INDEPENDENCE OF OPERATIONS

Reports directly to the design team leader / lighting designer

MINIMUM REQUIREMENTS

- BT-TS interior or architectural design.
- Very good knowledge of Autocad, Photoshop, 3D max and Microsoft office.
- Zero to three years of experience in a related field.

- Good command of English.
- Good interpersonal and communication skills.
- Positive attitude with a willingness to take initiatives and implement them.
- Ability to cope and work under high pressure.
- Maintain a high level of confidentiality.
